ADVANCED NUCLEAR CONSULTANTS

GE Optima:

The GE Optima NX cardiac camera features two aligned 90° detectors specifically designed for cardiac and small organ SPECT imaging. Its ultra-compact design allows it to easily fit into a 10' x 12' room. This product is shipped with a new NuQuest® processing workstation allowing you to stay at the forefront of processing techniques. Optional programs include 4DM SPECT, Cedars-Sinai QGS/QPS and Emory Cardiac Toolbox.
