Advanced Nuclear Consultants
2001 Karbach, Suite J
Houston, TX 77092

To Whom It May Concern:

I have recently had the pleasure of working with Mr. Richard Armijo and his staff at Advanced Nuclear Consultants in the placement of a GAMA Camera in a private practice setting in Silver City, NM. I found Richard and his consultants to be highly professional and I believe they did an outstanding job for us. They were readily available with any problems we had in the initial phases of installation, and when small problems did arise, they were able to rectify them quickly. My staff here in Silver City has enjoyed working with the staff at Advanced Nuclear Consultants very much.

I would certainly recommend them highly for any private practice cardiology group looking to install used nuclear cameras. I think that they have done an outstanding job for us.

Sincerely yours,

G. Scott Smith, M.D., FACC
